Clinic Letter - Outpatient Review

Patient: Margaret Ellison
Date of appointment: 08 November 2026
Reporting doctor: Dr A. Rahman, Consultant

Diagnoses

Type 2 diabetes mellitus; hypertension; hyperlipidaemia (new).

Current medications

Metformin 500 mg twice daily, continued.

Amlodipine 5 mg once daily, continued.

Atorvastatin 20 mg at night, started today.

Results and measurements

HbA1c 6.9 percent (previous 7.1 percent).

Blood pressure 132/80 mmHg.

LDL cholesterol 3.4 mmol/L, new measurement.

eGFR 80 mL/min/1.73 m2.

Findings

The patient reports feeling well. The family report one episode of dizziness on standing and a little ankle swelling; the patient is unsure whether it is new.

Plan

Continue current medication. Review the family's questions at the next appointment.
